

Clone (Copy) a Protocol

1. Log into [eProtocol](#) with your net ID and password
2. Click on the **IBC tab** to see your investigator Homepage for IBC submissions.

3. Click on the **Clone Protocol** button.

4. Select the protocol to clone using the radio button next to the Protocol ID and click on the **Clone Protocol** button.

	Protocol ID	Principal Investigator	Protocol Event	Form Type	Panel	Meeting Date
<input type="radio"/>	21-01-6382	[REDACTED]	APPROVED	AMENDMENT	IBC	
<input type="radio"/>	20-02-5834	[REDACTED]	APPROVED	NEW	IBC	02/19/2020

5. Click on the **Yes** button in the popup that appears.

6. eProtocol will return you to the Investigator Homepage and on it will be a note providing the protocol number of the new protocol that was created by cloning the protocol that was selected. For example: [Protocol 23-01-7958](#) is created by cloning protocol [20-01-5444](#).
